

# Bitcoin Market Intelligence — Model 8

## Executive Summary

Date: 2026-09-28  
Final Signal (T+1): **NO\_TRADE**  
Confidence: 0.59  
Volatility Regime: 0  
Macro Regime: 1

## Strategy Snapshot ( $\tau = 0.60$ )

Model 8 Strategy Total Return: -89.1%  
Buy & Hold BTC Total Return: 43.6%  
Strategy Sharpe: -0.90 | Buy & Hold Sharpe: 0.33  
Max Drawdown (Strategy): -90.8% | Max Drawdown (Buy & Hold): -76.6%  
Win Rate: 47.1% | Trade Coverage: 32.1% (fraction of days with a position)

## Equity Curve

2026-09-25: signal=NO\_TRADE, eff=NO\_TRADE, conf=0.51, ret=-0.37%  
2026-09-26: signal=NO\_TRADE, eff=NO\_TRADE, conf=0.68, ret=0.00%  
2026-09-27: signal=NO\_TRADE, eff=NO\_TRADE, conf=0.51, ret=0.00%  
2026-09-28: signal=NO\_TRADE, eff=NO\_TRADE, conf=0.59, ret=-0.00%

## Methodology Note

Model 8 is a regime-aware meta-ensemble that combines volatility (Model 2), price dynamics (Model 1), derivatives flow (Model 3), on-chain fundamentals (Model 4), and macro/liquidity (Model 6). A regime selector (8A) first filters for tradable environments based on volatility and macro regimes, and a directional classifier (8B) then chooses LONG / SHORT when confidence exceeds  $\tau$ . Performance metrics are computed on daily close-to-close returns.
